

## Hướng dẫn sử dụng javascript fill dữ liệu với bootstrap

### 1. Phần HTML (table)

```
<table class="table">
  <thead class="thead-dark">
    <tr>
      <th scope="col">#</th>
      <th scope="col">Firstname</th>
      <th scope="col">Lastname</th>
      <th scope="col">Email</th>
      <th scope="col">Avatar</th>
    </tr>
  </thead>
  <tbody>

  </tbody>
</table>
```

### 2. Phần javascript

```
const response = await fetch(`https://reqres.in/api/users?page=${page}&per_page=${per_page}`);
const users = await response.json();
console.log(users);
$('table tbody').empty();
for(const user of users.data) {
  $('table tbody').append(`
    <tr>
      <th scope="row">${user.id}</th>
      <td>${user.first_name}</td>
      <td>${user.last_name}</td>
      <td>${user.email}</td>
      <td>
        
      </td>
    </tr>
  `);
}
```
